

Kenneth Newby is a Canadian composer, recording artist, media artist, interaction designer, and educator.

Kenneth's compositional philosophy in music centres on listening deeply inward to sound itself and then shaping that internal structure into music that feels spiritually, ecologically, and culturally situated. The result is a music that is profoundly original and rewards repeated listening as it reveals its secrets.

His recorded output includes a series of highly regarded works beginning with the acclaimed *Ecology of Souls* in 1993 through the recent *From Solitude* of 2025.
